WORK EXPERIENCE

AKOS AI, 9 Month Contract

Aug 2025 - Apr 2026

Lead Financial Software Engineer

Remote

- Architected and built a 0-to-1 AI agent pipeline reading and analyzing live accounting data: full Sage Intacct ingestion of the general ledger, trial balance, subledgers, and vendor detail in Python across Palantir's Repositories, AIP, Ontology, and Workshop
- Owned the prompt design behind thousands of monthly accounting judgments that people had been making one at a time, ranking by materiality and returning the reasoning and source entry with each call, reducing close time by 70%
- Developed forward-looking cash flow models in Python combining AR aging, payment history, and open AP commitments into a rolling forecast, giving leadership a cash position weeks ahead of month-end close

RCN

Mar 2025 - Aug 2025

Founding Architect

Remote

- Owned technical architecture for a telecommunications consultancy pursuing federal contracts, building multi-agent AI workflows and Python models that checked each contract against the team's capacity to deliver

Planned Sabbatical

Dec 2023 - Feb 2025

Publicis Sapient Consulting

Jul 2022 - Nov 2023

Software (Solutions) Engineer

Denver, CO

- Client-facing solutions engineer on a new Salesforce implementation for a Tier 1 Canadian bank, presenting solution options to retail and commercial banking leadership and seeing the build through to handoff
- Built the business logic, front-end components, and extensive workflow automation replacing client tasks that had been manual and slow, cutting turnaround from days to hours
- Migrated 2M+ records at 99.9% integrity and engineered the REST integrations to core banking middleware, Snowflake, and SAP, consolidating client data into one system

Stone Pine Accounting

Nov 2018 - May 2020

Staff Accountant

Denver, CO

- Owned month-end close from the preparer side: journal entries, accruals, bank reconciliations, capital allocations, and account analysis across multi-entity PE fund structures
- Prepared GAAP financial statements, audit documentation, and investor reporting packages; automated 50% of daily tasks with Python and Excel/VBA

EDUCATION

University of Colorado Boulder: B.S. Computer Science (2020 - 2022) | B.S. & M.S. Accounting (2012 - 2017)

SKILLS

Applied AI: LLMs (Claude, GPT, Llama), Agent Orchestration, Function Calling, Structured Outputs, Guardrails, Evals and Accuracy Measurement, RAG (Hybrid Retrieval, pgvector), LangChain, Anomaly Detection

Engineering: Python (Pandas, NumPy, PyTorch), TypeScript, React, Node.js, SQL, Java, REST APIs, Distributed Systems, ETL, Docker, CI/CD, Testing Strategy

Platforms: AWS (Lambda, S3, API Gateway, Bedrock), Azure OpenAI, Palantir (Repositories, AIP, Ontology, Workshop), Snowflake, Spark, Kafka, Salesforce (Apex, LWC, Flow), MuleSoft

Accounting & Financial Systems: Month-End Close, Journal Entries, Accruals, Reconciliation, Revenue Recognition (ASC 606), GAAP, Financial Reporting, Audit Support, SOX Controls, ERP (Sage Intacct, QuickBooks, NetSuite, SAP)
