WORK EXPERIENCE

Cruize AI

Aug 2025 - Apr 2026

AI Financial Software Engineer, Contract

Remote

- Financial lead on AI data-analysis agent built end-to-end in Python on Palantir Foundry: owned the Sage Intacct ingestion layer for invoices, journal entries, GL data, financial ontology mapping, and orchestration over live ERP data
- Wrote production LLM agent code with tool calling, hybrid-retrieval RAG, and structured JSON outputs; built ETL pipelines processing 500K+ monthly transactions feeding the agent
- Implemented anomaly detection algorithms combining statistical baselines with LLM-augmented review, surfacing line-item invoice discrepancies, budget variance, and cash flow issues across multi-entity structures

RCN

Dec 2024 - Aug 2025

Founding Architect, Contract

Remote

- Led technical architecture across commercial, financial, and operational systems for a telecommunications consultancy pursuing federal government contracts
- Built multi-agent AI workflows and Python forecasting models for contract opportunity discovery, qualification, and pipeline value projection

Publicis Sapient

Jul 2022 - Nov 2023

Software (Solutions) Engineer

Denver, CO

- Embedded with a Tier 1 Canadian bank on a Salesforce engagement, owning technical delivery across retail and commercial banking divisions
- Ran consultative discovery to uncover client pain points, success metrics, and decision criteria; translated findings into tailored demos and solution design from presales through production handoff
- Engineered REST API integrations to core banking middleware, Snowflake, and SAP via Apex, MuleSoft, and Python; cut latency 70% and migrated 2M+ records at 99.9% integrity
- Built Apex services, Lightning Web Components, and Flow automations modeling relationship management workflows; reduced deployment cycles 50% via CI/CD

Gen II / Stone Pine Accounting

Nov 2018 - May 2020

Corporate Accounting Associate

Denver, CO

- Automated month-end close, journal entries, and accruals 50% with Python and Excel/VBA; performed bank reconciliations, intercompany eliminations, and account analysis across multi-entity PE fund structures
- Prepared GAAP-compliant financial statements and audit documentation for PE fund clients across multiple entities

EDUCATION

University of Colorado Boulder: B.S. Computer Science (2020-2022) | B.S. & M.S. Accounting (2012-2017)

SKILLS

Applied AI: LLMs (Claude, GPT, Llama), Agent Orchestration, Tool Use, Function Calling, Structured Outputs, RAG (Hybrid Retrieval, Vector DBs), Evals, MCP, LangChain

Engineering: Python (Pandas, NumPy, Scikit-learn, TensorFlow), TypeScript, SQL, Java, C++, REST APIs, ETL, Docker, Terraform, CI/CD, Event-Driven Architecture

Platforms: Palantir Foundry (Ontology, Pipelines, Functions), Salesforce (Apex, LWC, Flow), AWS (Lambda, S3, API Gateway, Bedrock), Snowflake, Sage Intacct, SAP, MuleSoft, Kafka

Sales Engineering: Discovery, Technical Scoping, Solution Design, Demos, Production Deployment, Customer Enablement
